- Ticket Validator with Bi-directional ticket transport mechanism.
- Real time clock with rechargeable backup battery.
- Maintenance free thermal printer with custom receipts. Slip printing capability.
- Electronic or paper journal.
- Easy for maintenance and service.

Designed to work with tickets from the APP3100 entry station, the APP3400 Fee Computer provides automatic and very fast fee calculation by simply inserting the ticket into the reader mechanism. Together with the APP3100 entry station, it forms a complete parking revenue control system. Supports credit card processing for fast, convenient payment. When located at a garage exit lane, APP3400 processes monthly/access cards as a part of the APP3000 revenue and access control system, eliminating the need for additional equipment. The processed ticket is printed and electronically encoded with all necessary information for automatic garage exit and revenue auditing. APP3400 supports the industry standard Ethernet TCP/IP communication which allows seamless integration in any type of small or enterprise networks including wireless and Internet connectivity.

Options

- Stand alone operation with built in inventory reports.
- Bar code operation.
- Valet parking operation.
- Built-in APP 3900 server capabilities for small parking lots.
- Contact-less access card processing at exit location.
